

## Replacing the Anchor Hammock connection ropes

1. Push the rope loop through the end of the fabric keeping the knot on the fabric side of the hammock
2. Pull the fabric through so the rope loop is at both ends.
3. Loop one end over the other and pull the end so the other end clamps tightly against the hammock fabric.
4. Hide the knot end of the loop inside the fabric.

Now the rope end is ready to pass through the hinge on the Hammock stand.

How to tie the right Knot
